Print on card stock or heavy paper. Cut up the numbers into a deck of cards. Deal out 4 cards per person and put them into 2 2-digit numbers to and add them.

You want to try to get the highest possible answer.

You can also play for the lowest possible answer.

You can also deal out 3 cards and make one two-digit number and one one-digit number and play for highest score or lowest score.

You can also deal out 6 cards and make 2 3-digit numbers and paly the same way.

Play for 5 rounds of he game and the high score wins.

This can also be played for subtraction where the highest difference wins or the lowest difference wins. You can also play for multiplication or division too.

0	0	0	0	0
1	1	1	1	1
2	2	2	2	2
3	3	3	3	3
